June 3, 2017

Actions to Stop Doing:

1. Working on project
 - a. This is the end of the project

Actions to Start Doing:

1. Looking to the future and possibly taking the app to the next level.
 - a. **Actually getting pulled over for testing**

Actions to keep doing:

1. **Establish more rigorous QA testing for new (future) commits**

Work Completed/not Completed:

Completed User Stories:

1. As a user I want to be aware of interactions with police in my community, in order to participate in the gist of the app
2. As a user I want to be able to see incidents projected onto a geographical map so that I can understand where incidents occur
3. As a user I want to be aware of interactions with police in my community, in order to participate in the gist of the app
4. As a developer, I want to be able to connect to the remote Droplet instead of Docker so that we can test our production environment.

Other Features:

5. Add Drop-Down Menu to title-bar
6. Create How-To/FAQ/App Manifesto
7. Make all Constraints on activities device-independent
8. Write 3-5 tests that get run on build
9. Connection Timeout crashes app[BUG]
10. Add indication to current events page if no nearby events are found.
11. Missing confirm end broadcast dialog.

Not Completed:

12. End of Course Administrativa

Work completion Rate:

At this time, we have completed the feature set-out for Sprint 3.
There are known bugs and we hope to fix many of them before the acceptance, otherwise they will be noted/.
